

Through the Today's Migrant platform, Western Union seeks to unlock insights into these essential members of society. It starts with the release of this survey exploring the perspectives, opinions, and motivations of migrants in 6 countries – France, Germany, Japan, United Arab Emirate, United Kingdom, and United States. What we learned, or confirmed, was that today's migrants are engines of optimism, tech forward and motivated by a desire to build a better future.

Looking beyond the survey, we have also embarked on an exciting research project with The Fletcher School at Tufts University to measure the need for, and acceptance of, migrants across 200 countries and conduct other analyses. The partnership will provide us with valuable insights, and also serves as one of the first "data for good" initiatives at Western Union where we seek to use more of our company's assets to drive societal and economic impact.

When I arrived at Western Union nearly 9 months ago, I was struck by the purpose-driven culture and enthusiasm for serving our customers – many of whom are migrants. What we do every day at Western Union is empower people to connect to what matters most by providing access to simple and trusted financial solutions that enable them, their family and community to achieve more and thrive.

We had done research highlighting the importance of remittances being sent home, but what became increasingly clear is that there is an equal need to highlight that migrants are socioeconomically diverse, increasingly tech savvy, economically crucial to the countries they live in – and that there is more to be done to deliver a broad set of inclusive financial services. We will use Today's Migrant as a lens to look at the world and share unique and important perspectives with a broad set of stakeholders.

I hope you will join the conversation and share your ideas for how we can continue to increase understanding of the global migrant community.

Ryan Erenhouse  
Head of External Affairs & Public Impact
